Social Distancing Alert System

Social Distancing Alert System uses existing IP cameras and CCTV cameras combined with Computer Vision to detect if people are at a specific distance and adhere to social distancing or not. Notifications and Alerts Interface; When two or more than two persons are found in close contact in the camera, an alarm alerts people standing in that area and notification is sent to concerned authorities or guards who can ask people to maintain distance.

Face-Mask Detection Platform uses Artificial Network to recognize if a user is not wearing a mask. The app can be connected to any existing or new IP cameras to detect people without a mask. If the camera captures an unrecognized face, a notification can be sent out to the administrator. Temperature detection system measures body temperature by scanning people's faces using Thermal Cameras.

People counting system uses existing IP cameras and CCTV cameras combined with Computer Vision to detect people. Accurately counting traffic that enters your store or facility empowers organizations to make smarter business decisions. IWX offers a full range of people counter systems that help organizations collect foot traffic information. People counting System gives actionable information that increases efficiency and profitability. With IWX real-time traffic counters, you can gain vital insights on revenue, staffing and marketing. Make informed operational choices with our robust visitor traffic counting software.

How does it work?

A user-friendly website allows the user to see who was not wearing a mask, who was not obeying social distancing and see the photo or the video captured by the camera. User can also generate reports to download and integrate with any other third-party integration.
